

Why the Swine Flu Vaccine and ALL Vaccines are Illegal under International Law

Dec. 25, 2009 - by Gerald Hernesmaa

The use of vaccines violates the following:

1.) **Law of Informed Consent** - <http://medical-dictionary.thefreedictionary.com/informed+consent>

"Consent given with full knowledge of the risks involved, probable consequences, and the alternatives." (In order for informed consent to be considered valid, the client must be competent and the consent should be given voluntarily)

2.) **The Nuremberg Code - 1947 (10 Principles)** - <http://ohsr.od.nih.gov/guidelines/nuremberg.html>

"The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

#9 - During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.

#10 - During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

3.) **The Hippocratic Oath** - 1st do no harm - <http://www.members.tripod.com/nktiuro/hippocra.htm>

4.) **The Precautionary Principle** - The obligation to prevent harm (The 4 Principles) -

<http://www.sdearthtimes.com/et0398/et0398s4.html>

The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.

5.) **Vaccine Fillers and Ingredients** - <http://www.vaclib.org/basic/ingredmar701.htm>

"...includes, but not limited to -- poisons, carcinogens, neurotoxins and immunotoxins such as mercury, aluminum, formaldehyde, MSG and also phenoxyethanol - **used in antifreeze - known to be toxic to all cells - capable of disabling the immune system's primary response mechanism** - (also a common cosmetic ingredient) - <http://www.knowvaccines.com/phenol.htm>

6.) **The 7 Principles of the Nuremberg Tribunal, 1950** - [http://www.icrc.org/ihl.nsf/FULL/390?](http://www.icrc.org/ihl.nsf/FULL/390?OpenDocument)

7 Principles of International Law -- Recognized in the Charter of the Nuremberg Tribunal & in the Judgment of the Tribunal

Principle 2 - The fact that internal law does not impose a penalty for an act which constitutes a crime under international law does not relieve the person who committed the act from responsibility under international law.

Principle 3 - The fact that a person who committed an act which constitutes a crime under

international law acted as Head of State or responsible Government official does not relieve him from responsibility under international law.

Principle 6 - The crimes hereinafter set out are punishable as crimes under international law:

c.) - Crimes against humanity: Murder, extermination, enslavement, deportation and other inhuman acts done against any civilian population, or persecutions on political, racial or religious grounds, when such acts are done or such persecutions are carried on in execution of or in connection with any crime against peace or any war crime.

7.) **Universal Declaration of Human Rights, 1948** - <http://www.un.org/en/documents/udhr/#atop>

Article 3 - Everyone has the right to life, liberty and security of person.

Security of Person - <http://www.beyondintractability.org/essay/security>

On the individual level, security is most often understood as safety. This safety includes freedom from harm, whether physical or psychological. Threats to an individual's security can produce the fear or anxiety mentioned above. The United Nations Universal Declaration of Human Rights states that all people are entitled to "security of person." This declaration reinforces the concept of freedom from physical and psychological harm. Yet, what measures will be taken to protect an individual from harm? The most common forms of protection are legal structures that protect individuals from threats to their security. These include, but are not limited to, laws against murder, sex crimes, bodily harm, theft, psychological harm such as coercion. (Coercion definition below)

8.) **The Convention on the Rights of the Child, Nov. 20, 1989** -

<http://www2.ohchr.org/english/law/crc.htm> - <http://www.unicef.org/crc/>

Built on varied legal systems and cultural traditions, the Convention is a universally agreed set of non-negotiable standards and obligations. These basic standards—also called human rights—set minimum entitlements and freedoms that should be respected by governments. These standards are both interdependent and indivisible. Spells out the 3 basic human rights that children everywhere have:--

- 1.) the right to survival;
- 2.) to develop to the fullest;
- 3.) to protection from harmful influences, abuse and exploitation;
- 4.) and to participate fully in family, cultural and social life.

The 4 core principles of the Convention are

- A.) non-discrimination;
- B.) devotion to the best interests of the child;
- C.) the right to life, survival and development; and
- D.) respect for the views of the child.

Article 13

1. The child shall have the right to freedom of expression; this right shall include freedom to seek, receive and impart information and ideas of all kinds, regardless of frontiers, either orally, in writing or in print, in the form of art, or through any other media of the child's choice.

Article 17

States Parties recognize the important function performed by the mass media and shall ensure that the child has access to information and material from a diversity of national and international sources, especially those aimed at the promotion of his or her social, spiritual and moral well-being and physical and mental health. To this end, States Parties shall:

- (a) Encourage the mass media to disseminate information and material of social and cultural

benefit to the child and in accordance with the spirit of Article 29;

(b) Encourage international co-operation in the production, exchange and dissemination of such information and material from a diversity of cultural, national and international sources;

(e) Encourage the development of appropriate guidelines for the protection of the child from information and material injurious to his or her well-being, bearing in mind the provisions of Articles 13 and 18.

Article 19

1. States Parties shall take all appropriate legislative, administrative, social and educational measures to protect the child from all forms of physical or mental violence, injury or abuse, neglect or negligent treatment, maltreatment (harm, injury, hurt, violation), or exploitation, including sexual abuse, while in the care of parent(s), legal guardian(s) or any other person who has the care of the child.

2. Such protective measures should, as appropriate, include effective procedures for the establishment of social programmes to provide necessary support for the child and for those who have the care of the child, as well as for other forms of prevention and for identification, reporting, referral, investigation, treatment and follow-up of instances of child maltreatment described heretofore, and, as appropriate, for judicial involvement.

Article 27

1. States Parties recognize the right of every child to a standard of living adequate for the child's physical, mental, spiritual, moral and social development.

Additional Violations

The CDC & National Institute of Health are military organizations -

<http://www.brasschecktv.com/page/324.html>

Military structures are incompatible with the free flow of information, with free and open discourse and debate. The use of military organizations to enforce mandatory vaccination on a civilian populace is in opposition to the Nuremberg Code of 1947, which takes precedence over any other laws by any country or government on this topic, or any policy requirement by any government or **corporation**. Nuremberg Code is recognized as everyone's inalienable right. That is why it was passed into law.

Randomized Double-blind controlled trial -

http://www.lumrix.net/medical/epidemiology/randomized_controlled_trial.html

Science dictates that only a randomized double-blind, placebo-controlled study can generate unbiased results in any clinical trial. In the history of vaccine development, no such study has ever been performed. It is only unscientific opinions and pharmaceutical propaganda which have propelled the mythological validity, safety and effectiveness of vaccines. Dozens of controlled studies have scientifically verified the **immunotoxicity**, **neurotoxicity** and **sterility** of common vaccine ingredients which **destroy** human health, yet they are all ignored by conventional medicine. -

http://preventdisease.com/news/09/103009_vaccine_sterility_immunotoxicity_neurotoxicity.shtml

US Judge Rules Against Compulsory Vaccinations - Sept. 29, 2009 - for everyone in USA, and New York HealthCare Workers - US Court issues Preliminary Injunction to stop mandatory vaccinations and to hold the government and drug companies responsible for reactions - U.S. government sued for gross negligence and violation of the US Constitution.

Global influence of pharmaceutical industry on WHO and the global swine flu campaign. The New Medical Fraud, Crime Scandal of the Century. - http://preventdisease.com/news/09/122109_Euro_parliament_investigating_WHO_2010.shtml

The Goal of Every H1N1 Swine Flu Vaccine: Immunotoxicity, Neurotoxicity and Sterility = Genocide

"There should be a public outcry and challenge to every public health official, medical specialist or scientist (from any country) who justifies the inoculation of their population without providing the evidence of safety and effectiveness of the respective H1N1 vaccine, (or any vaccine), in their country." - http://preventdisease.com/news/09/103009_vaccine_sterility_immunotoxicity_neurotoxicity.shtml

Definitions

Double Blind Study - <http://www.thefreedictionary.com/double-blind+study>

An experimental procedure in which neither the subjects of the experiment nor the persons administering the experiment know the critical aspects of the experiment; "a double-blind procedure is used to guard against both experimenter bias and placebo effects."

A controlled trial in which neither the participants nor the experimenter or observer are aware of which group each participant is assigned to. - <http://www.encyclopedia.com/doc/1062-oubleblindtrial.html>

In a double-blind trial, one researcher allocates a series of numbers to 'new treatment' or 'old treatment'. The second researcher is told the numbers, but not what they have been allocated to. Since the second researcher does not know, they cannot possibly tell the patient, directly or otherwise, and cannot give in to patient pressure to give them the new treatment. In this system, there is also often a more realistic distribution of sexes and ages of patients. Therefore double-blind (or randomized) trials are preferred, as they tend to give the most accurate results.

Consent - <http://www.businessdictionary.com/definition/consent.html>

Express or implied approval, or voluntary agreement, compliance, or permission for some act, decision, or purpose. Consent obtained through coercion, fraud, or undue influence is invalid.

Coercion - <http://www.answers.com/topic/coercion>

"...coercion, in law, the unlawful act of compelling a person to do, or to abstain from doing, something by depriving him of the exercise of his free will, particularly by use or threat of physical or moral force.

In many states of the United States, statutes declare a person guilty of a misdemeanor if he, by violence or injury to another's person, family, or property, or by depriving him of his clothing or any tool or implement, or by intimidating him with threat of force, compels that other to perform some act that the other is not legally bound to perform. Coercion may involve other crimes, such as assault.

In the law of contracts, the use of unfair persuasion to procure an agreement is known as duress; such a contract is void unless later ratified. At common law, one who commits a crime under coercion may be excused if he can show that the danger of death or great bodily harm was present and imminent.

However, coercion is not a defense for the murder or attempted murder of an innocent third party. -
